

Chicago Biomedical Consortium

Eighth Annual Symposium

Protein Folding and Misfolding in Health and Disease

October 29, 2010

9:00 a.m. to 5:45 p.m.

The University of Chicago
Ida Noyes Hall
1212 East 59th Street
Chicago, Illinois 60637

SPEAKERS

Scott T. Brady, PhD, University of Illinois at Chicago. *Protein folding, Signal Transduction, and Fast Axonal Transport in Neurodegenerative Diseases*

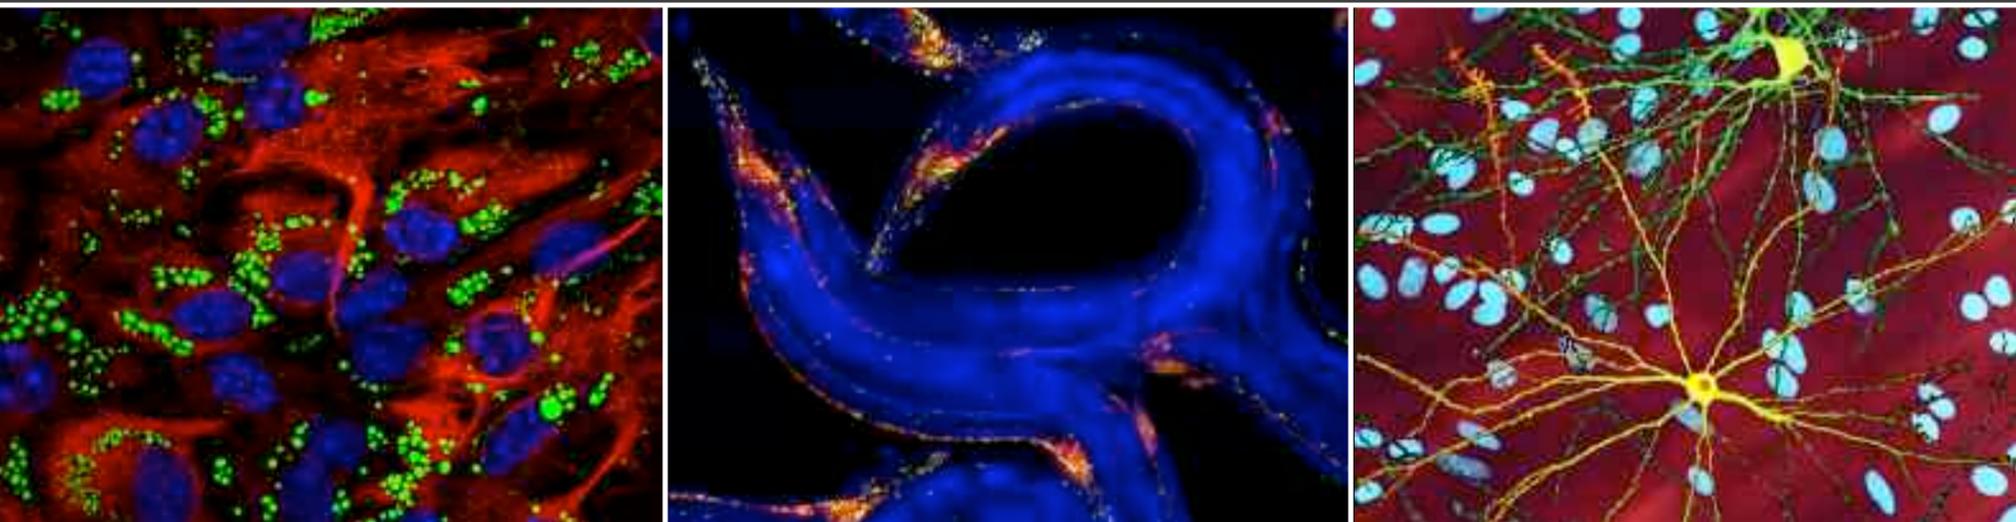

Ana Maria Cuervo, MD, PhD, Albert Einstein College of Medicine. *Selective Autophagy and Aging*

Steven Finkbeiner, MD, PhD, University of California, San Francisco. *Untangling the Role of Protein Misfolding and Other Knotty Problems in Neurodegenerative Disease*

Judith Frydman, PhD, Stanford University. *Molecular Origami: Protein Folding and Misfolding in the Eukaryotic Cytosol*

Randal J. Kaufman, PhD, University of Michigan Medical School. *Protein Misfolding, Oxidative Stress, and the Unfolded Protein Response*

Richard I. Morimoto, PhD, Northwestern University. *The Stress of Misfolded Proteins in Aging and Neurodegenerative Disease*

There is no charge for this event, but you must register online by October 22, 2010, to ensure admission.

To present a poster, submit your abstract online before noon, October 8, 2010.

For details on the program and registration, go to:
